Poland, Białystok

I'm front-end developer for over a decade where i can works with long and short term project which gave me a lot of experience and also a chance to increase my skills. I cooperated with both individual projects, smaller and bigger (5-15 members) teams. I also found myself in many industries such as logistics, public transport, healthcare, e-commerce or gamification. I made clean-up and functional JavaScript/CSS code and semantic HTML which affects SEO/Accessibility. My experience doesn't end with the frontend, because I also worked with Azure or AWS clouds (CI/CD) , as well as with NodeJS.

TECHNOLOGY

Javascript

Javascript ★★★★★ NodeJS ★★★★★
Typescript ★★★★★ Grunt ★★★★★
